Professional Summary

MSc in Artificial Intelligence and BSc in Mathematics and Computer Science from the Technical University of Madrid. Skilled in applying AI techniques to real-world problems, particularly in air traffic management, through an academic internship at CRIDA A.I.E. Strong analytical mindset with a solid mathematical foundation and international experience from an Erasmus+ program at KTH, Stockholm.

Experience

AI Research Intern

02/2025 - 07/2025

CRIDA A.I.E. – Madrid, Spain

Researched RNN and Transformer architectures on large-scale 4D flight trajectory datasets, developing AdherNet, a novel model for spatial-temporal similarity.

Built and automated MLOps pipelines using TensorFlow and MLflow for scalable big data experimentation. Collaborated with air traffic engineers to improve trajectory adherence and anomaly detection in real-time systems.

Education

Master's Degree In Artificial Intelligence

09/2024 - 07/2025

Universidad Politécnica De Madrid – Madrid, Spain

Graduated with Outstanding Academic Performance (GPA 9.13/10), completing a Master's thesis on "Analysis of Trajectory Matching and Flight Plan Adherence using AI" during an internship at CRIDA, earning a perfect score (10/10), while mastering Machine Learning, Deep Learning, NLP, Neural Networks, Metaheuristics, and Evolutionary Computing.

Erasmus+ Exchange Program

09/2023 - 07/2024

Kungliga Tekniska Högskolan – Stockholm, Sweden

Completed advanced coursework in Data Mining, Human-Computer Interaction, and Risk Management, gaining valuable international research and collaboration experience.

Bachelor's in Mathematics & Computer Science

09/2020 - 07/2024

Universidad Politécnica de Madrid – Madrid, Spain

Graduated with a thesis on pre-trained deep learning models for computer vision tasks (GPA 8.5/10), building strong foundations in algorithms, data structures, statistics, topology, and calculus, and finishing with an average of 7.12/10.

Skills

Programming (Python, Java, C, R, SQL, MATLAB, Git); **Machine Learning** (TensorFlow, Keras, PyTorch, MLflow, Pandas); **Web** (HTML, CSS, JavaScript);

Languages

Spanish - Native

English - Advanced (C1)

French - Fluent (B2)
